

To open K4DZX Lite Log locate the K4DZX Lite Log application within the K4dZX Lite Log folder.

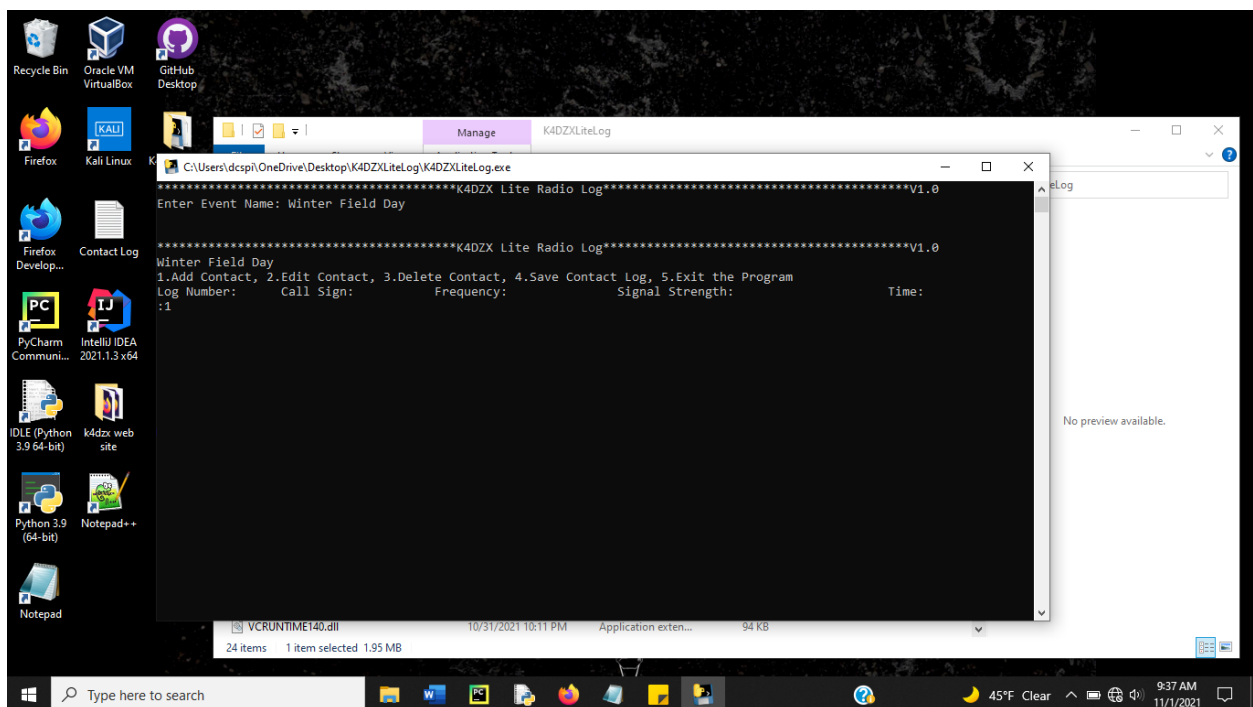

The first step after the application is running is to name the event that you will be working.

In this example Winter Field Day will be used.

After an event name is entered the main menu will pop up.

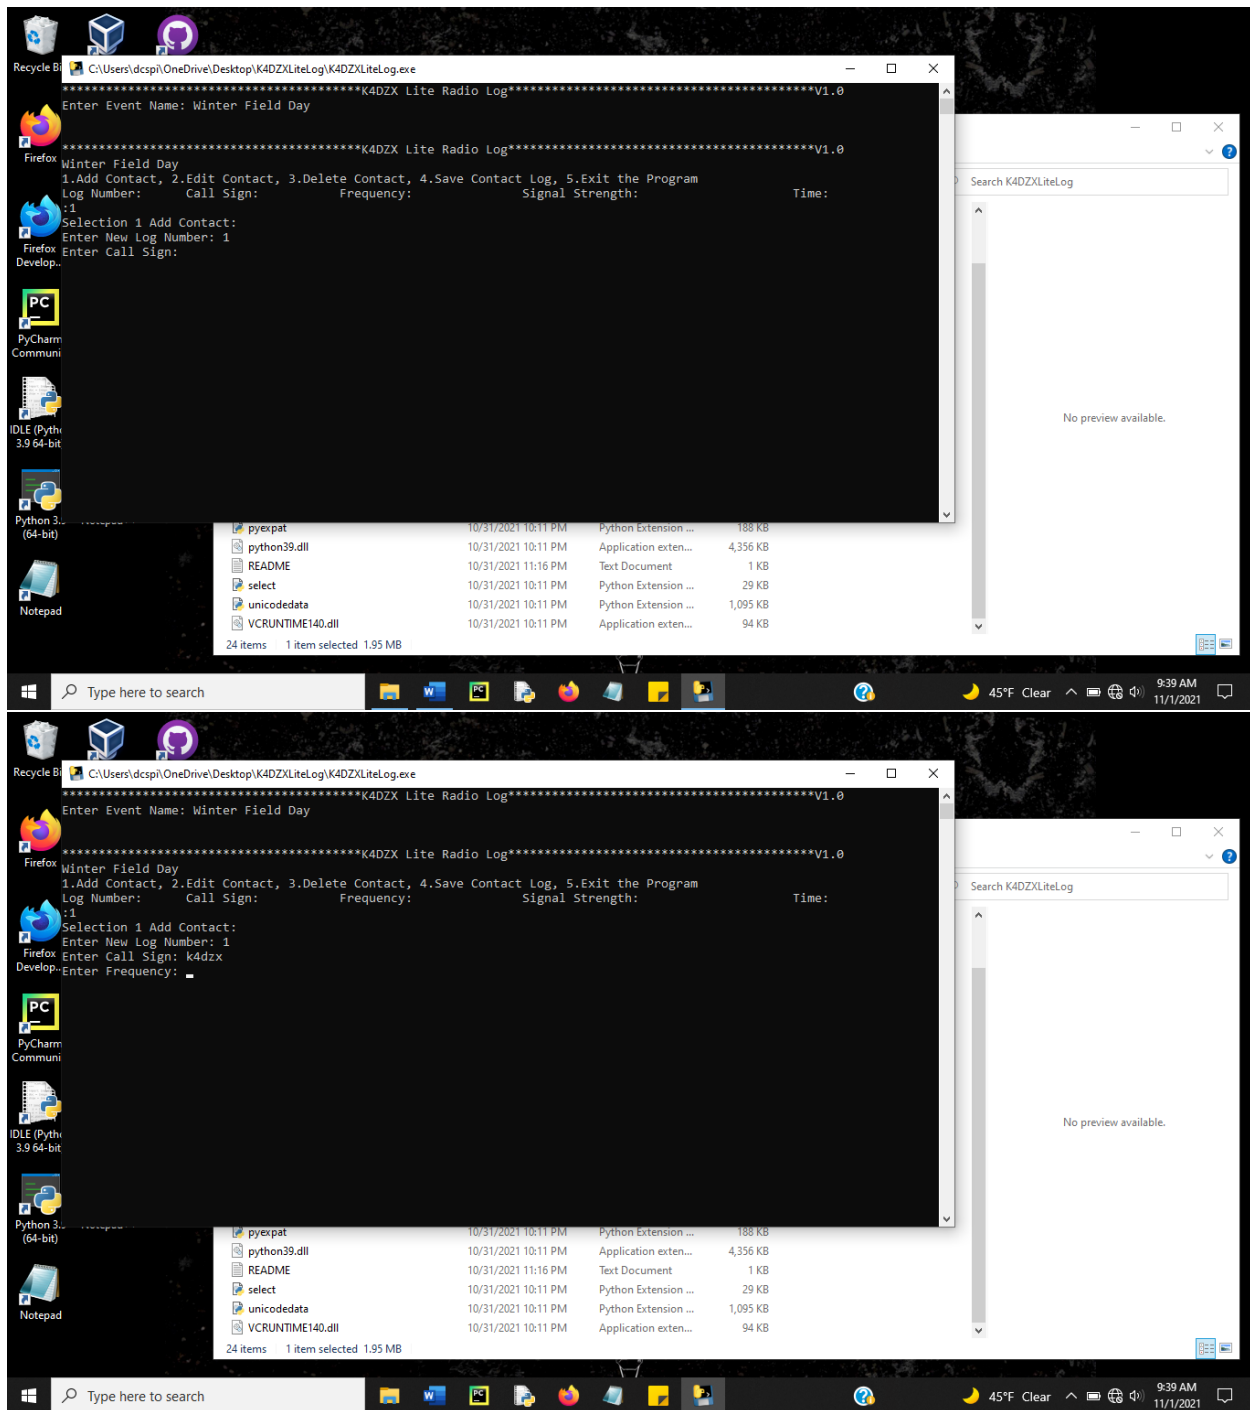

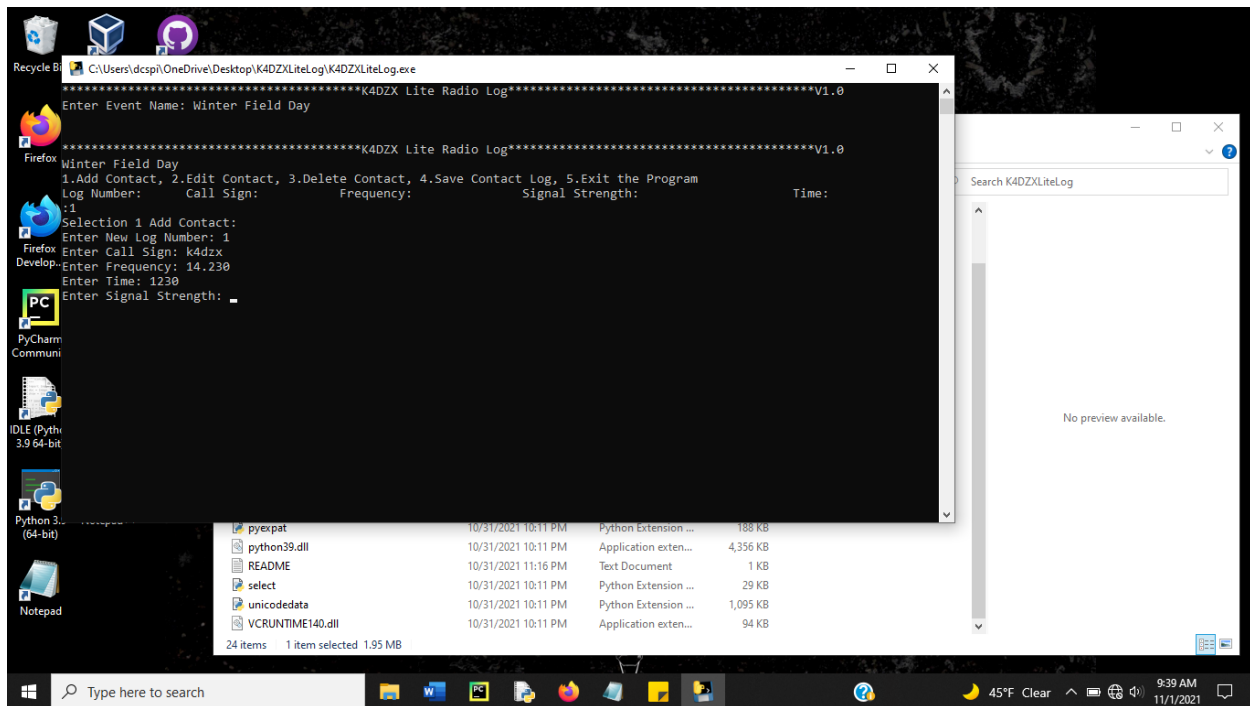

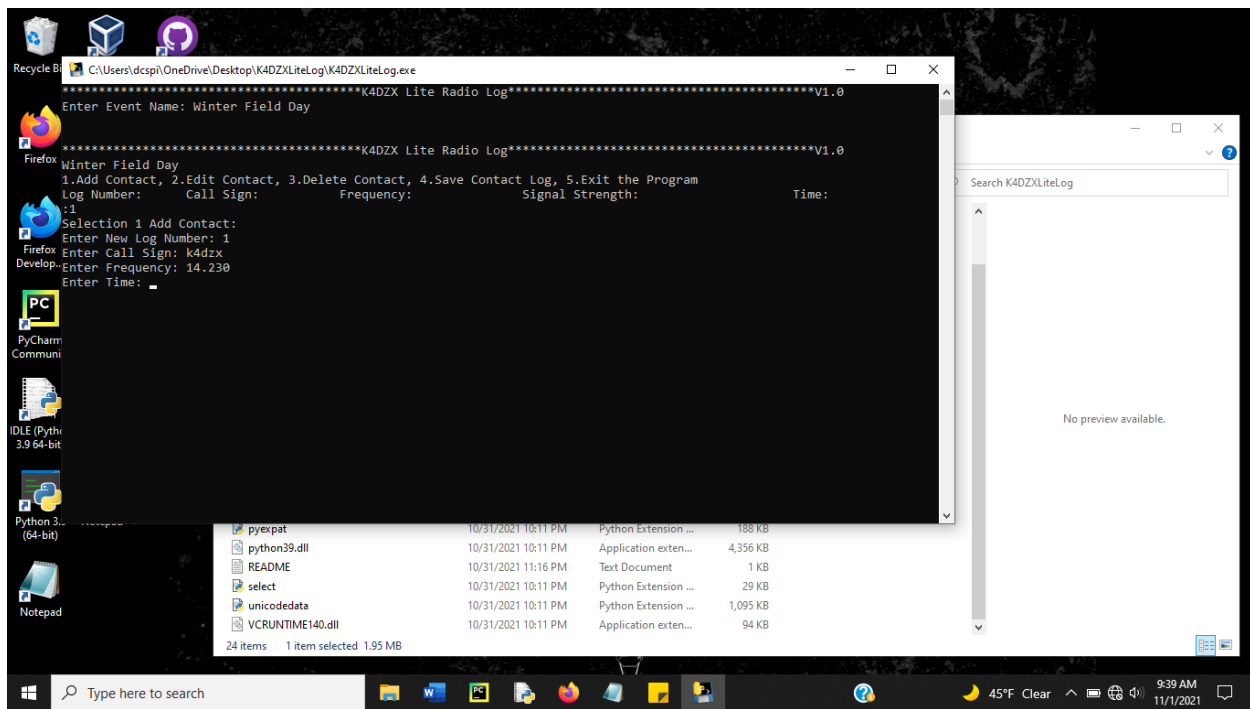

To add a contact press 1 then enter.

Now enter the log number and press enter. This example it's the first log so it will be 1.

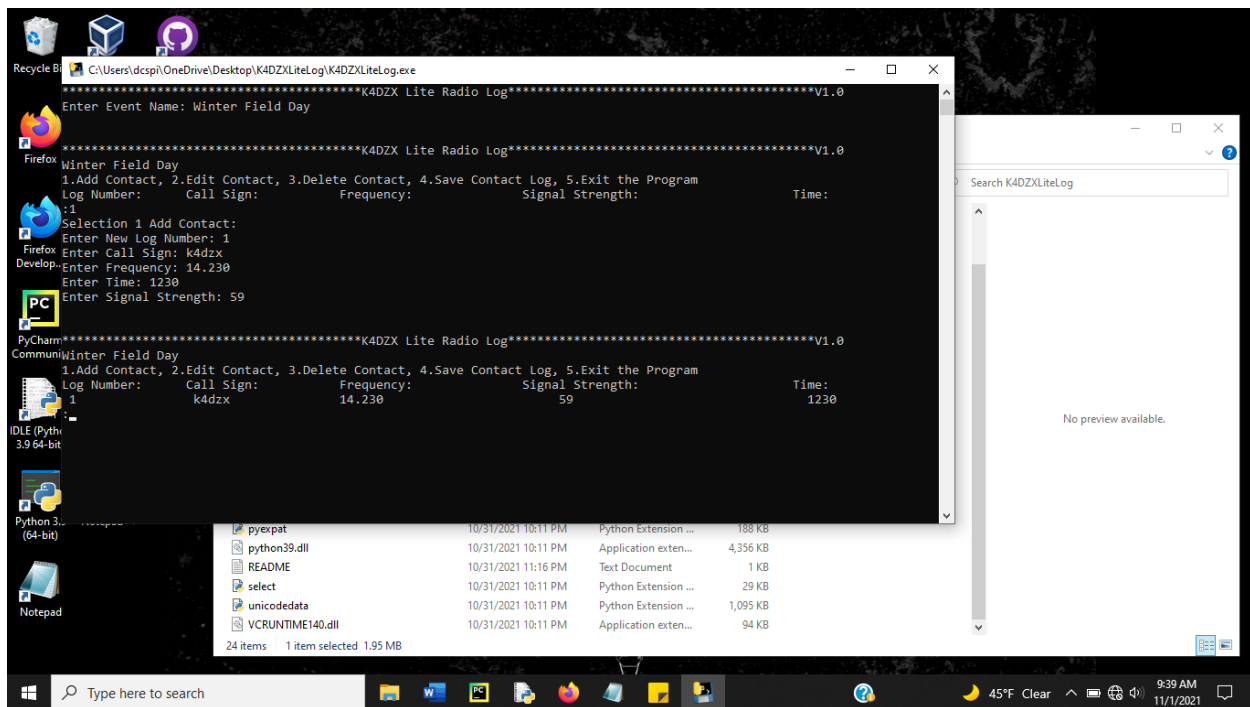

Now enter the call sign and press enter.

Followed by the Frequency, time, and signal strength.

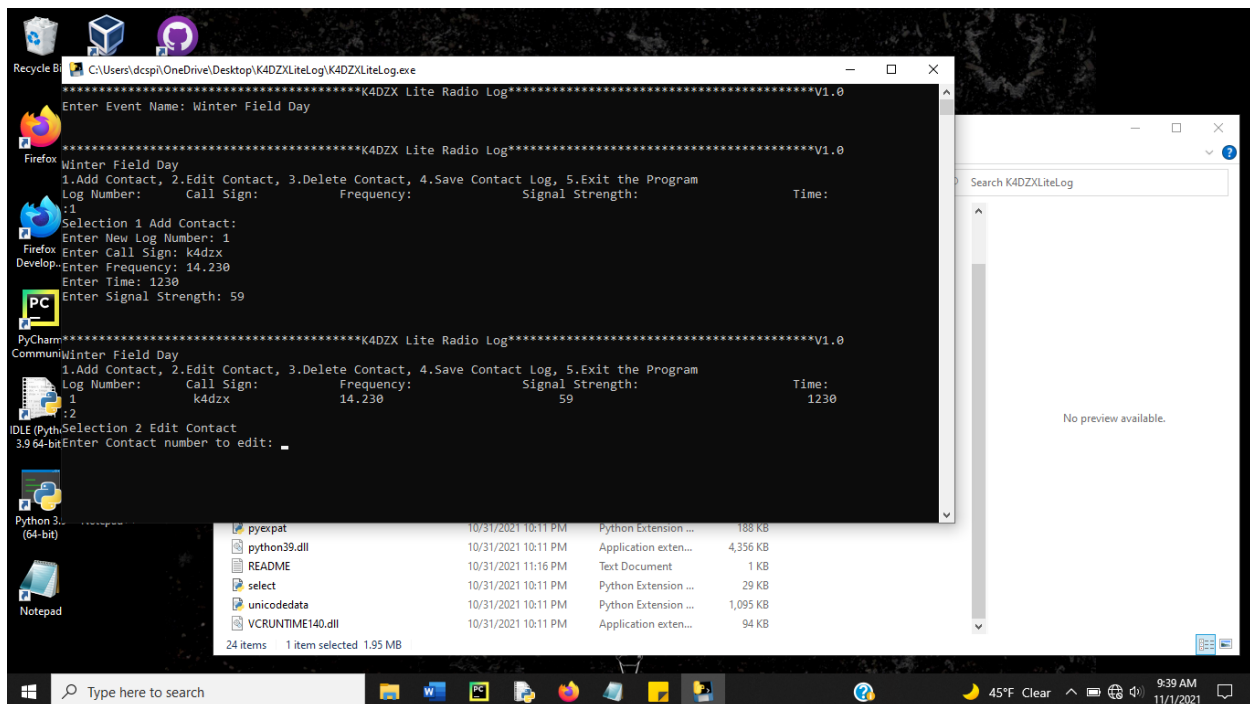

After you enter the Signal Strength and press enter the application will go back to the main menu and the new contact will be on the list.

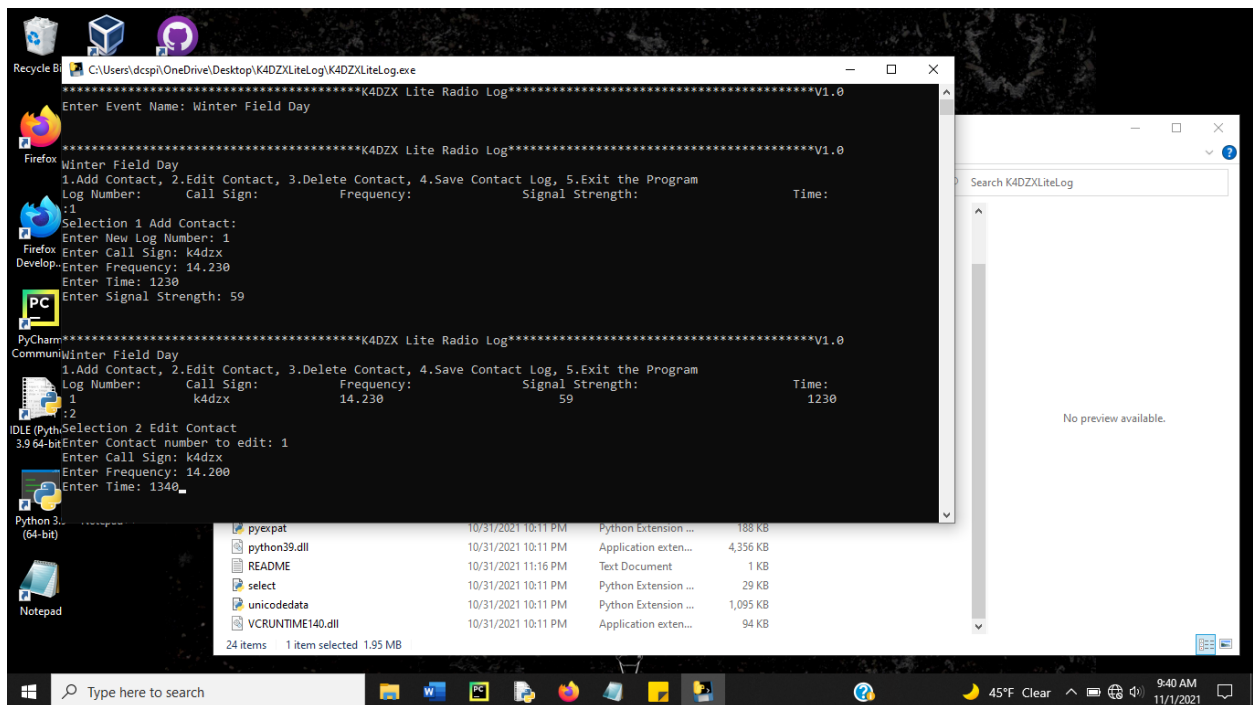

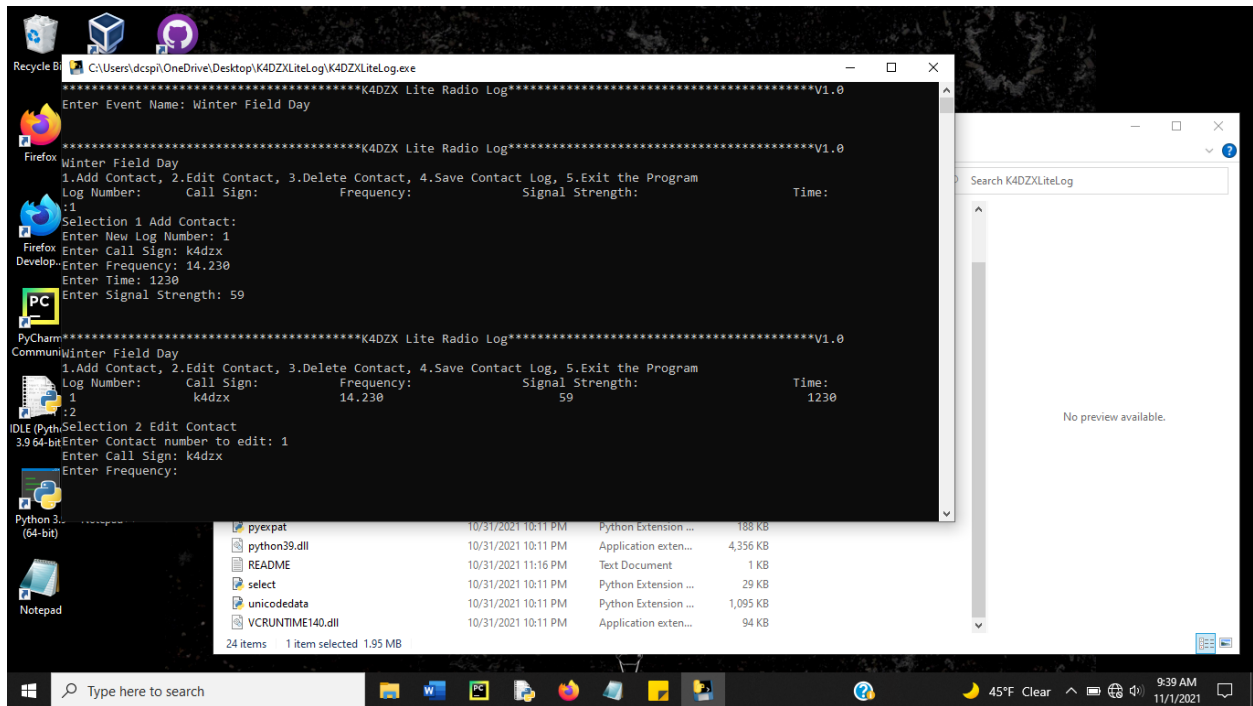

## Edit a contact

To edit a contact press 2 and enter. It will then ask you which contact you want to edit enter the corresponding log number and press enter.

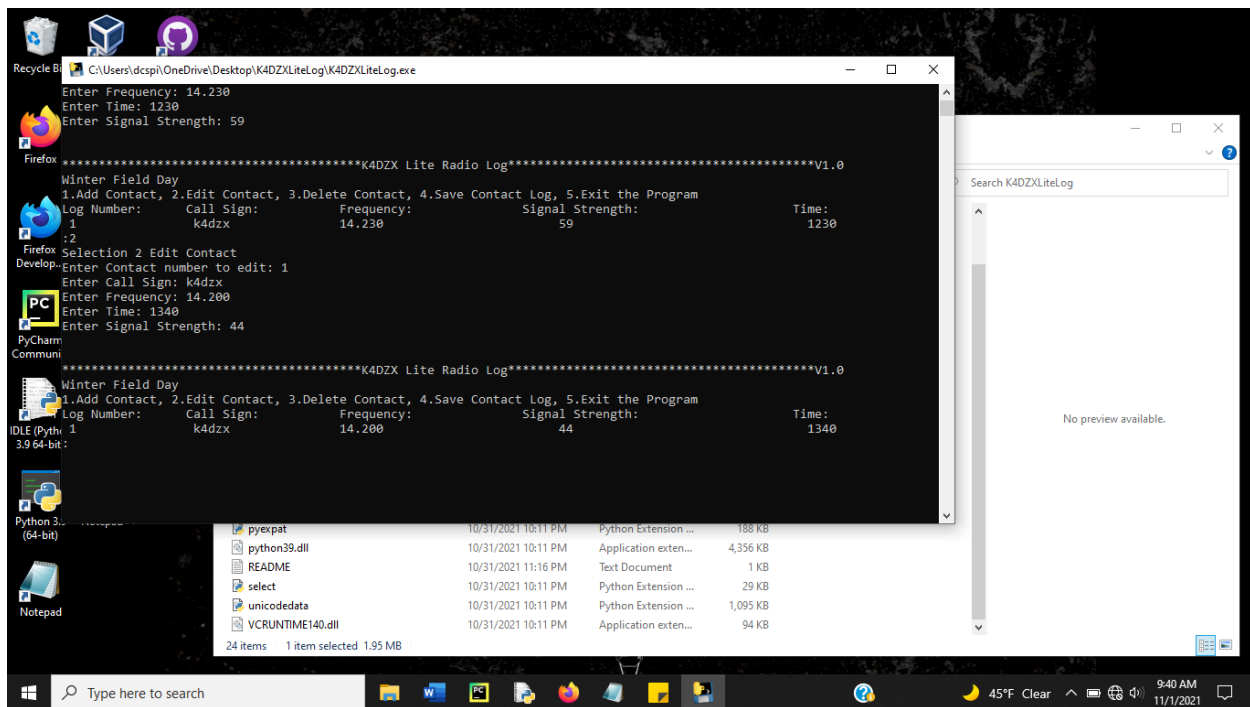

The application will ask for a call sign. If the call sign does not need to be edited enter the same call sign and press enter.

The application will then ask for frequency, time, and signal strength. In this example the frequency, time, and signal strength need to be edited.

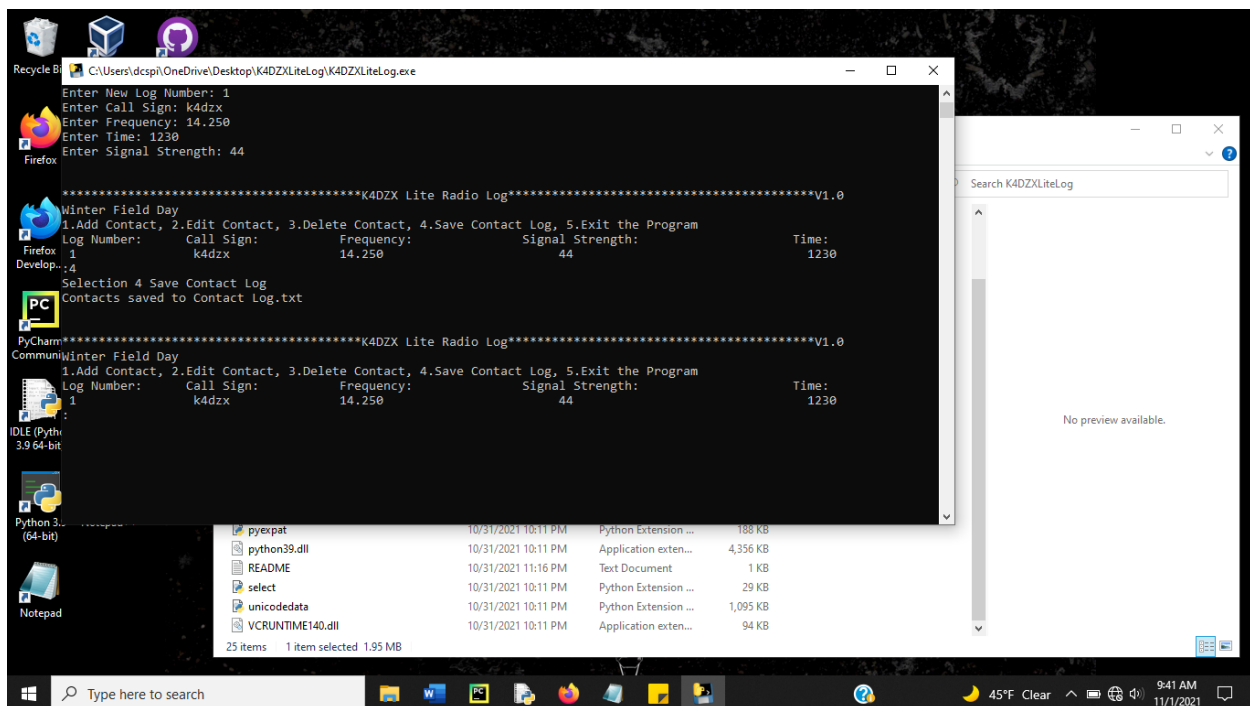

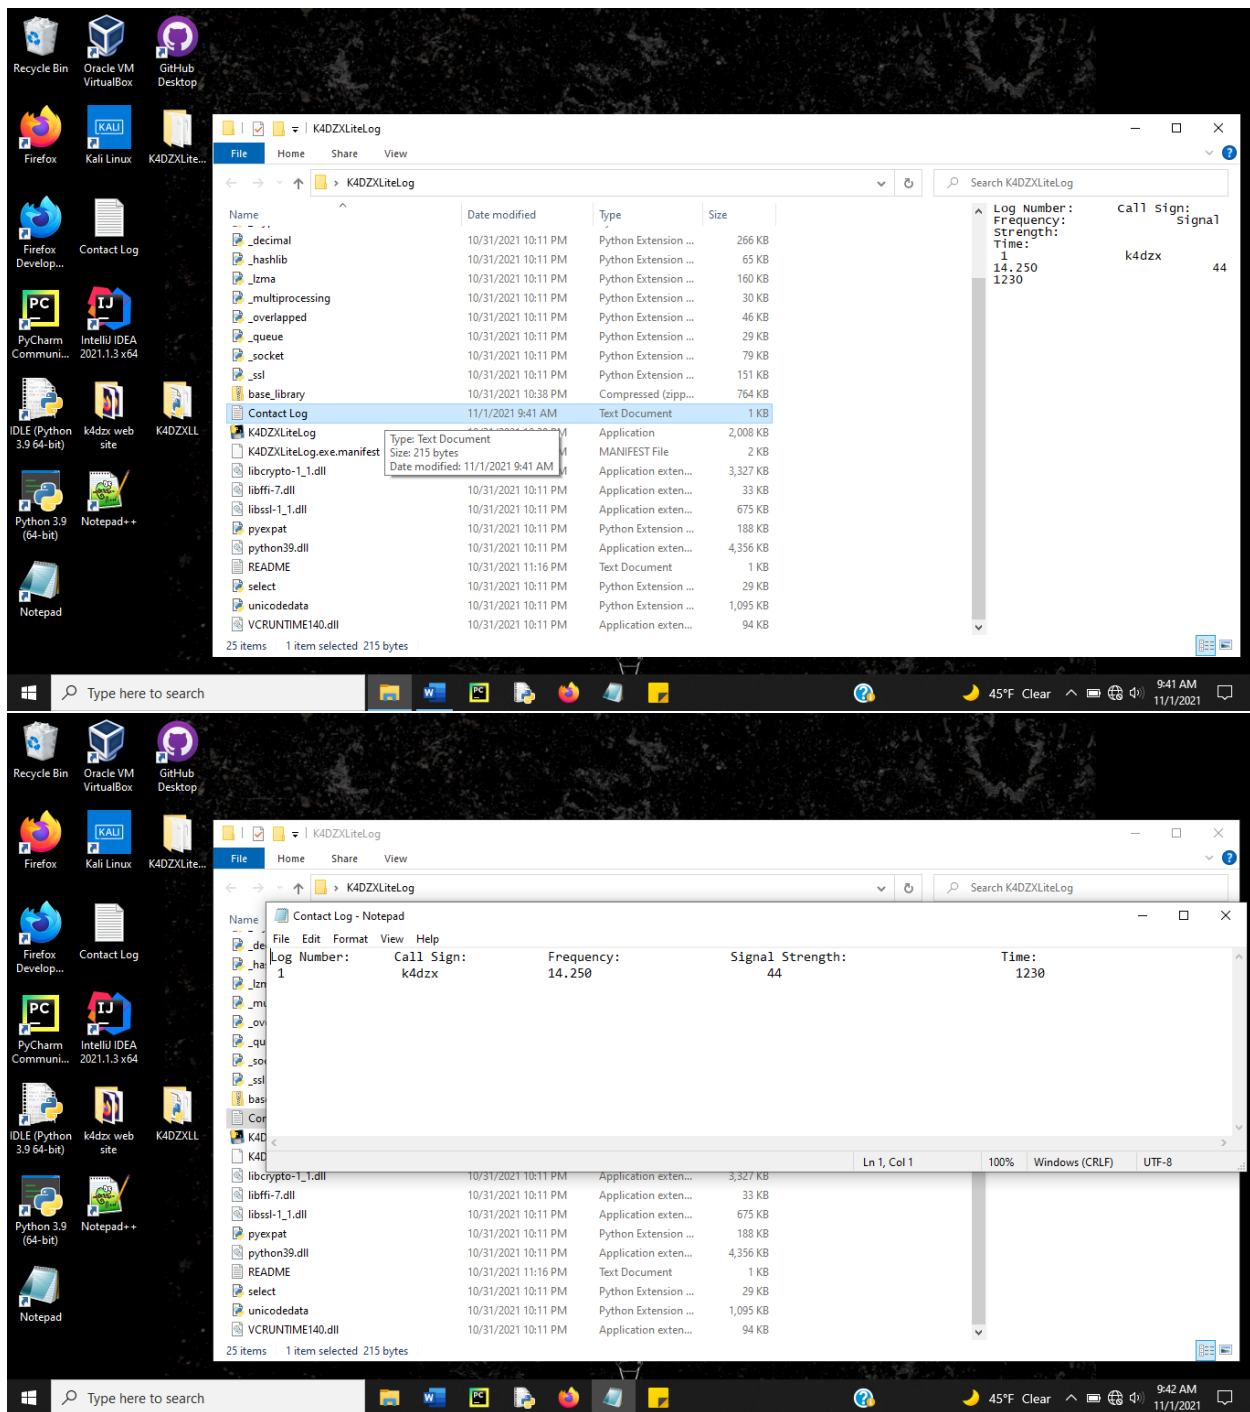

To delete a contact press 3 and enter. Then enter the log number you wish to delete, and press enter. That log number will now be deleted. The application will then return to the main menu.

To save the log press 4 and enter. The contacts will be saved to contact log .txt this file will be saved in the K4DZX lite log folder and will need to be renamed. Also the contest name will need to be added inside the .txt

To exit the application, press 5 and enter. Don't forget to save
